DIGITAL MARKETING

WEB APPS

Your business needs typically get translated into technology challenges that warrant the need for custom solutions. From e-commerce enablement to custom portals, we have the experience of designing and implementing these kinds of projects. We would love to be on your side bringing our technology expertise to be a competitive advantage to your business.

Technology Consulting

Technology is what drives us. We are truly passionate about using technology to help our clients take their business to the next level. Our philosophy on the choice of technology is very simple – to be vendor-neutral and select the “best technology for the job”. We take great care to identify the technology stack that best suits your unique needs.

Custom solutions

We realize that your unique needs warrant building of one or more customer solutions. Be it developing a data collection platform, trace and track of supply chain, ecommerce solutions, developing internal facing or external facing portals or to customizing and deploying technology and business frameworks, we are ready to serve you NOW.

Creating Value

We don't believe that ONE technology is the answer to ALL problems. However, we do believe that with the right use of technology or a combination of technologies, problem can be solved and opportunities can be realized.

MOBILITY SOLUTIONS

MOBILE APPLICATION DEVELOPMENT

Insights Intelligence is a leading mobile application company based out from Dubai, UAE. We carry an extensive experience and strong skills in mobile application development. If you are looking for a mobile application development company, which builds Smart Apps for smart devices with a key deliverable of quality within committed time lines, your search ends at Insights Intelligence.

Our App Expertise:

- Insights Mobility

- Web Service Integration
- Augmented Reality
- Healthcare App
- Education App
- Business Utility
- M-Commerce Solutions
- Order Taking
- Maps Navigation App
- Location Tracking
- Distribution
- Finance App
- Travel App
- Entertainment App

STRATEGIC MOBILE CONSULTING

As the mobile platforms and services are rapidly evolving, the creation of an enterprise wide mobile strategy is becoming challenging. Also it cannot be denied that certain aspects of an organization are more suited to mobilization than others. Investment return computation for mobility is something which business needs to consider. To implement a mobile solution, it requires companies to build capability to combine many different components that includes networks, applications, devices and their services as well as the middleware to interface processes.

INFRASTRUCTURE SERVICES

You do not have to worry about your infrastructure. That's our job. With the emergence of cloud computing, virtualization and mobility, Insights Intelligence is well aligned with market trends and demands. We offer the technology, processes, and people clients need to transform their IT infrastructure, achieving efficiencies, cost savings and other strategic business outcomes.

Transparency, predictability and control - essential disciplines for operating successfully in a dynamic environment. Insights Intelligence's outcome-based delivery model achieves results you can count on. Insights Intelligence's infrastructure solutions include committed service levels that are aligned to IT and business needs.

Our Solutions Include:

- Infrastructure Planning And Transformation
- Data Center Optimization And Consolidation
- Data Center Facilities And Management
- Network Management/Cable Management
- Wi-Fi

Industries we work in :

- Apartments
- Community Villas
- Education
- Healthcare
- Transport & Logistics
- Free zones
- Leisure & Hospitality

Flexible access control systems allow workers to get on with their jobs while protecting staff from uninvited guests and businesses from property and information theft.

CLOUD SERVICES

Cloud computing has radically changed the world of software. More customers are seeing the value of having applications on the cloud. We have designed, developed and deployed several cloud applications. We can specifically help you to:

- Assess your software platforms and products for cloud readiness.
- Refurbish and revamp your applications to be cloud ready.
- Migrate your targeted applications to the cloud.
- Scale your applications that are already on cloud.

The cloud is here to stay

Software implementations that would cost 5x the license cost are a thing of the past. The software industry has matured and deploying applications on the cloud has become common across the world. Service Oriented Architecture on the Cloud deliver a technology choice that is hard to resist for the businesses as they bring costs and overheads down increasing the ROI significantly.

We have built platforms that have enhanced the business delivery with reduced cost and increased customer base. We have developed several mission-critical applications for businesses where PaaS has become more competitive advantage.

Talk to us today and we will help you make your SaaS and Paas dreams come true.

IOT- INTERNET OF THINGS

The Internet of Things (IoT) refers to the ever-growing network of physical objects that feature an IP address for internet connectivity and the communication that occurs between these objects and other Internet-enabled devices and systems.

The Internet of Things extends internet connectivity beyond traditional devices like desktop and laptop computers, smartphones and tablets to a diverse range of devices and everyday things that utilize embedded technology to communicate and interact with the external environment, all via the Internet.

As objects become embedded with sensors and gain the ability to communicate, the new information networks promise to create new business models, improve business processes, and reduce costs and risks.

We currently focus on customised IOT solutions for homes, small and medium businesses using competitiv and reliable IOT boards.

BIG DATA

Information explosion is going to stay and grow. This manifold growth of information is due to businesses and individuals embracing digital communications and creating data accumulation of unforeseen proportions. If your business is one of those that have this problem, your technology solutions are surely under a stress! We are familiar with such challenges and have helped companies overcome them.

Our Products :

- Edfutura (Education Analytics)
- Amviews (Business Analytics)
- Insights Dashboards
- Admission Optimizer

Industries we work in :

- Education
- Healthcare
- Manufacturing
- Retail
- Customer Experience
- Government
- Smart Cities
- Food

From our point of view, this challenge also presents unprecedented opportunities. This data generated by complex systems has tones of knowledge, which if leveraged correctly can reveal high potential business opportunities, reduced costs and higher positive impact for organizations. We provide solutions for comprehensive management of distributed data stores, and delivery across desktop, mobile and web applications.

DIGITAL MARKETING

CUSTOMER EXPERIENCE BASED APPROACH

The easiest way to future proof your business is to have customers that love you. The easiest way to fail is to love your idea or product more than you love your customers. We focus on customer experience and our product will keep changing to serve you best.

“Customer Service
is not a department,
It’s an Attitude”

Let us Start a Business Together

“Our promise, there will always be an Innovation or Intervention in what we deliver to our customers”
